### DC Justice League – THE FLASH

**Bio:** Young Barry Allen's life stopped the minute his mother was murdered. The true killer never found, its mystery obsessed Barry, driving him to become a forensic scientist. Consumed by his work, he spent his life chained to his desk, solving every case that flew across it. But when a freak lightning bolt hits a nearby shelf in his lab, Barry receives super-speed, becoming the Flash. Now,

he'll race up buildings, across oceans, and around the world to get his man—while getting introduced to a world so much bigger than his old life of microscopes and cold cases.

## **AUDITION TEXT**

### **THE FLASH Speech**

I wasn't always a Superhero, I used to be a scientist. One night while I was working in my laboratory, a lightning bolt broke through the roof and shattered a case full of chemicals. Those chemicals splashed onto me and mixed together along with the lightning. Well, let's just say I was never the same again. It turned out I was enhanced by the chemical reaction, and I can now move extremely fast. I also have super-human senses and reflexes. Because I gained these powers from a lightning strike, I chose to use the lightning bolt as my symbol.

As The Flash, I need to be not only physically fast and agile, but also a quick thinker. I am the fastest man alive, let's just say somewhere between faster than the speed of sound and the speed of light—an easier to way to put it: I can move faster than you can see.

The Justice League each have different skills and abilities that we could bring to the fight. A team that can quickly respond to any crisis. We have faced off against some of the most diabolical—the most dangerous—the most downright EVIL super-villains the world has ever seen!
